

Reduce! Reuse! Refill!

Refill Station Grant Program

Valley Water is excited to partner with the community through our Refill Station Grant Program. These grants are designed to provide funding for the installation of water bottle refill stations to expand drinking water access throughout Santa Clara County, especially in economically underserved communities or locations serving school-age children and students.

Grantees will receive \$5,000 per refill station. After the application is approved and the agreement is executed, grantees will receive half of the funds upfront. Once the refill station is installed and all required documents are provided to Valley Water, grantees will receive the remaining funds.

Valley Water has a total of \$100,000 in grant funding available this year. Applications are accepted on a rolling basis until all available funds are disbursed.

Who is eligible?

- Public agencies: special districts, cities, towns and county agencies
- Schools, community colleges or universities
- 501(c)(3) nonprofit organizations
- Nonprofits without 501(c)(3) exempt status but can demonstrate they are an affiliate of a nonprofit organization with 501(c)(3) tax-exempt status that acts as a fiscal sponsor.
- Organized community groups with an established structure that can identify an individual responsible for signing the agreement and meeting insurance requirements.
- Private entities, such as a private water district/agency or for-profit company.

All applicants, except public entities and nonprofit organizations, must demonstrate that the refill station will be installed in an area with public access in Santa Clara County.

YOUR TAX DOLLARS AT WORK

Funding for the Valley Water Refill Station Grants Program is made possible through the **Safe, Clean Water and Natural Flood Protection Program**, which Santa Clara County voters approved in November 2020.
