# Submeter Rebate

*For individual tenants within  
multi-family homes or  
mobile home parks.*

**Receive a rebate of \$150  
per installed water submeter.**

*Maximum rebates may  
be bigger in some  
cost-sharing areas.*

**Valley Water provides Silicon Valley with safe, clean  
water for a healthy life, environment and economy.**

## What are submeters?

Submeters are water meters installed for individual tenants within multi-family homes or mobile home parks. Submeters allow individual units to pay for the water they use.

## Benefits

Adding water submeters...

- can help keep rent and HOA dues lower because water costs are taken out.
- encourages residents to fix or report leaks, helping with long-term maintenance.
- makes residents responsible for their own water use—just as residents are responsible for their own electric bill.

## How much water can my complex save?

Installing water submeters can **reduce water usage at complexes by 15-30%**.

## Simple application process

1. Submit the application before the submeters are installed.
2. After receiving a Notice to Proceed, purchase and install submeters.
3. Meet rebate requirements and submit paperwork indicating completion.

*Note: All programs are subject to funding availability and program restrictions.*
