

# Zoom Webinar Instructions

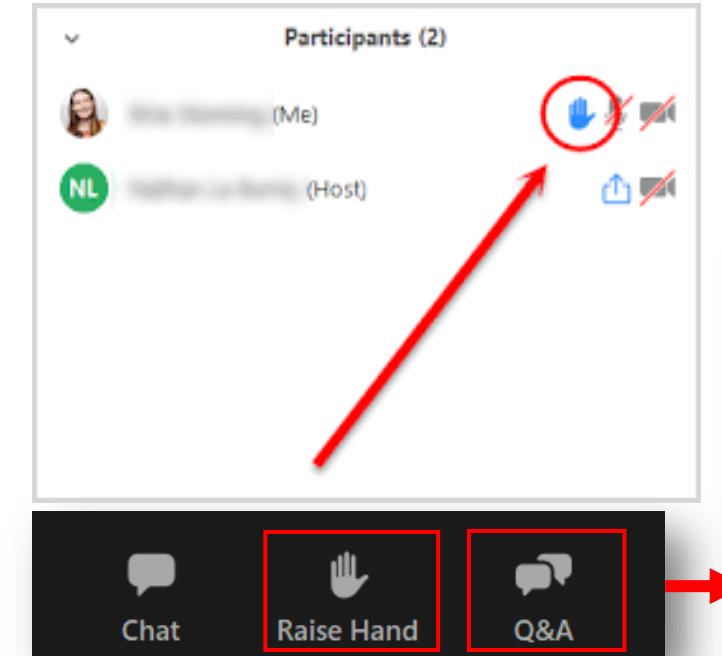

## Join Computer Audio

## If internet unstable, use Phone Audio

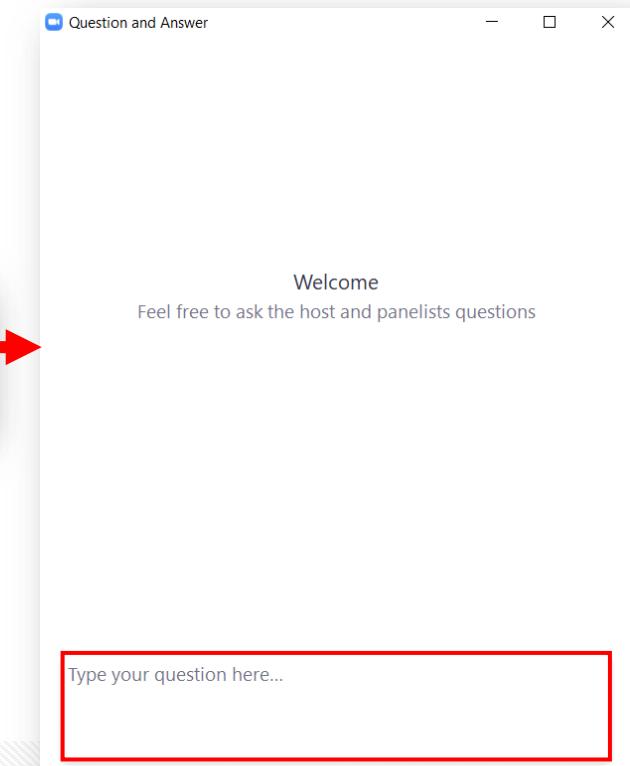

- Check your invite/email for call-in number and meeting ID
- Dial call-in number: **1-669-900-9128**
- Enter webinar ID then #.

## Ask a Question

*After we enable your mic,  
you have to unmute yourself before  
you verbally ask your question.*

*If only on phone:  
Press \*9 to raise your hand if  
Press \*6 to mute/unmute yourself.*

# Rinconada Water Treatment Plant Reliability Improvement Project

Phases 3-6

# Agenda

- Background
- Project Objectives
- Project Phases
- Phases 3-6 Work
- Demolition of Clarifiers
- New Facilities
- Timeline
- Project Information

# Background - Rinconada Water Treatment Plant (RWTP)

- Second-largest of Valley Water's Treatment plants
- RWTP was originally constructed in 1967
- Valley Water's sole plant that provides Treated water to the West Valley (Los Gatos, Saratoga, Los Altos, etc.)

Plant Original Construction

# Project Objectives

- Upgrade aging equipment
- Comply with updated seismic codes
- Meet current water quality standards
- Improve plant safety
- Increase water production
- 80 million gallons per day (MGD) to 100 MGD
- Improvement to the reliability of water supply

Raw Water Flow Control and Metering Facility

# Overview of Project Phases

Original

Phases 1-2 (Completed)

Phases 3-6 (Current)

# Phases 3-6 Work

## Phase 3

- Clarifier Demolition
- Surveying
- Potholing
- Traffic Control

## Phase 4

- New Ozone Generation Building
- New Liquid Oxygen Facility
- New Dual Media Filters
- Chlorine Contact Basin

## Phases 5-6

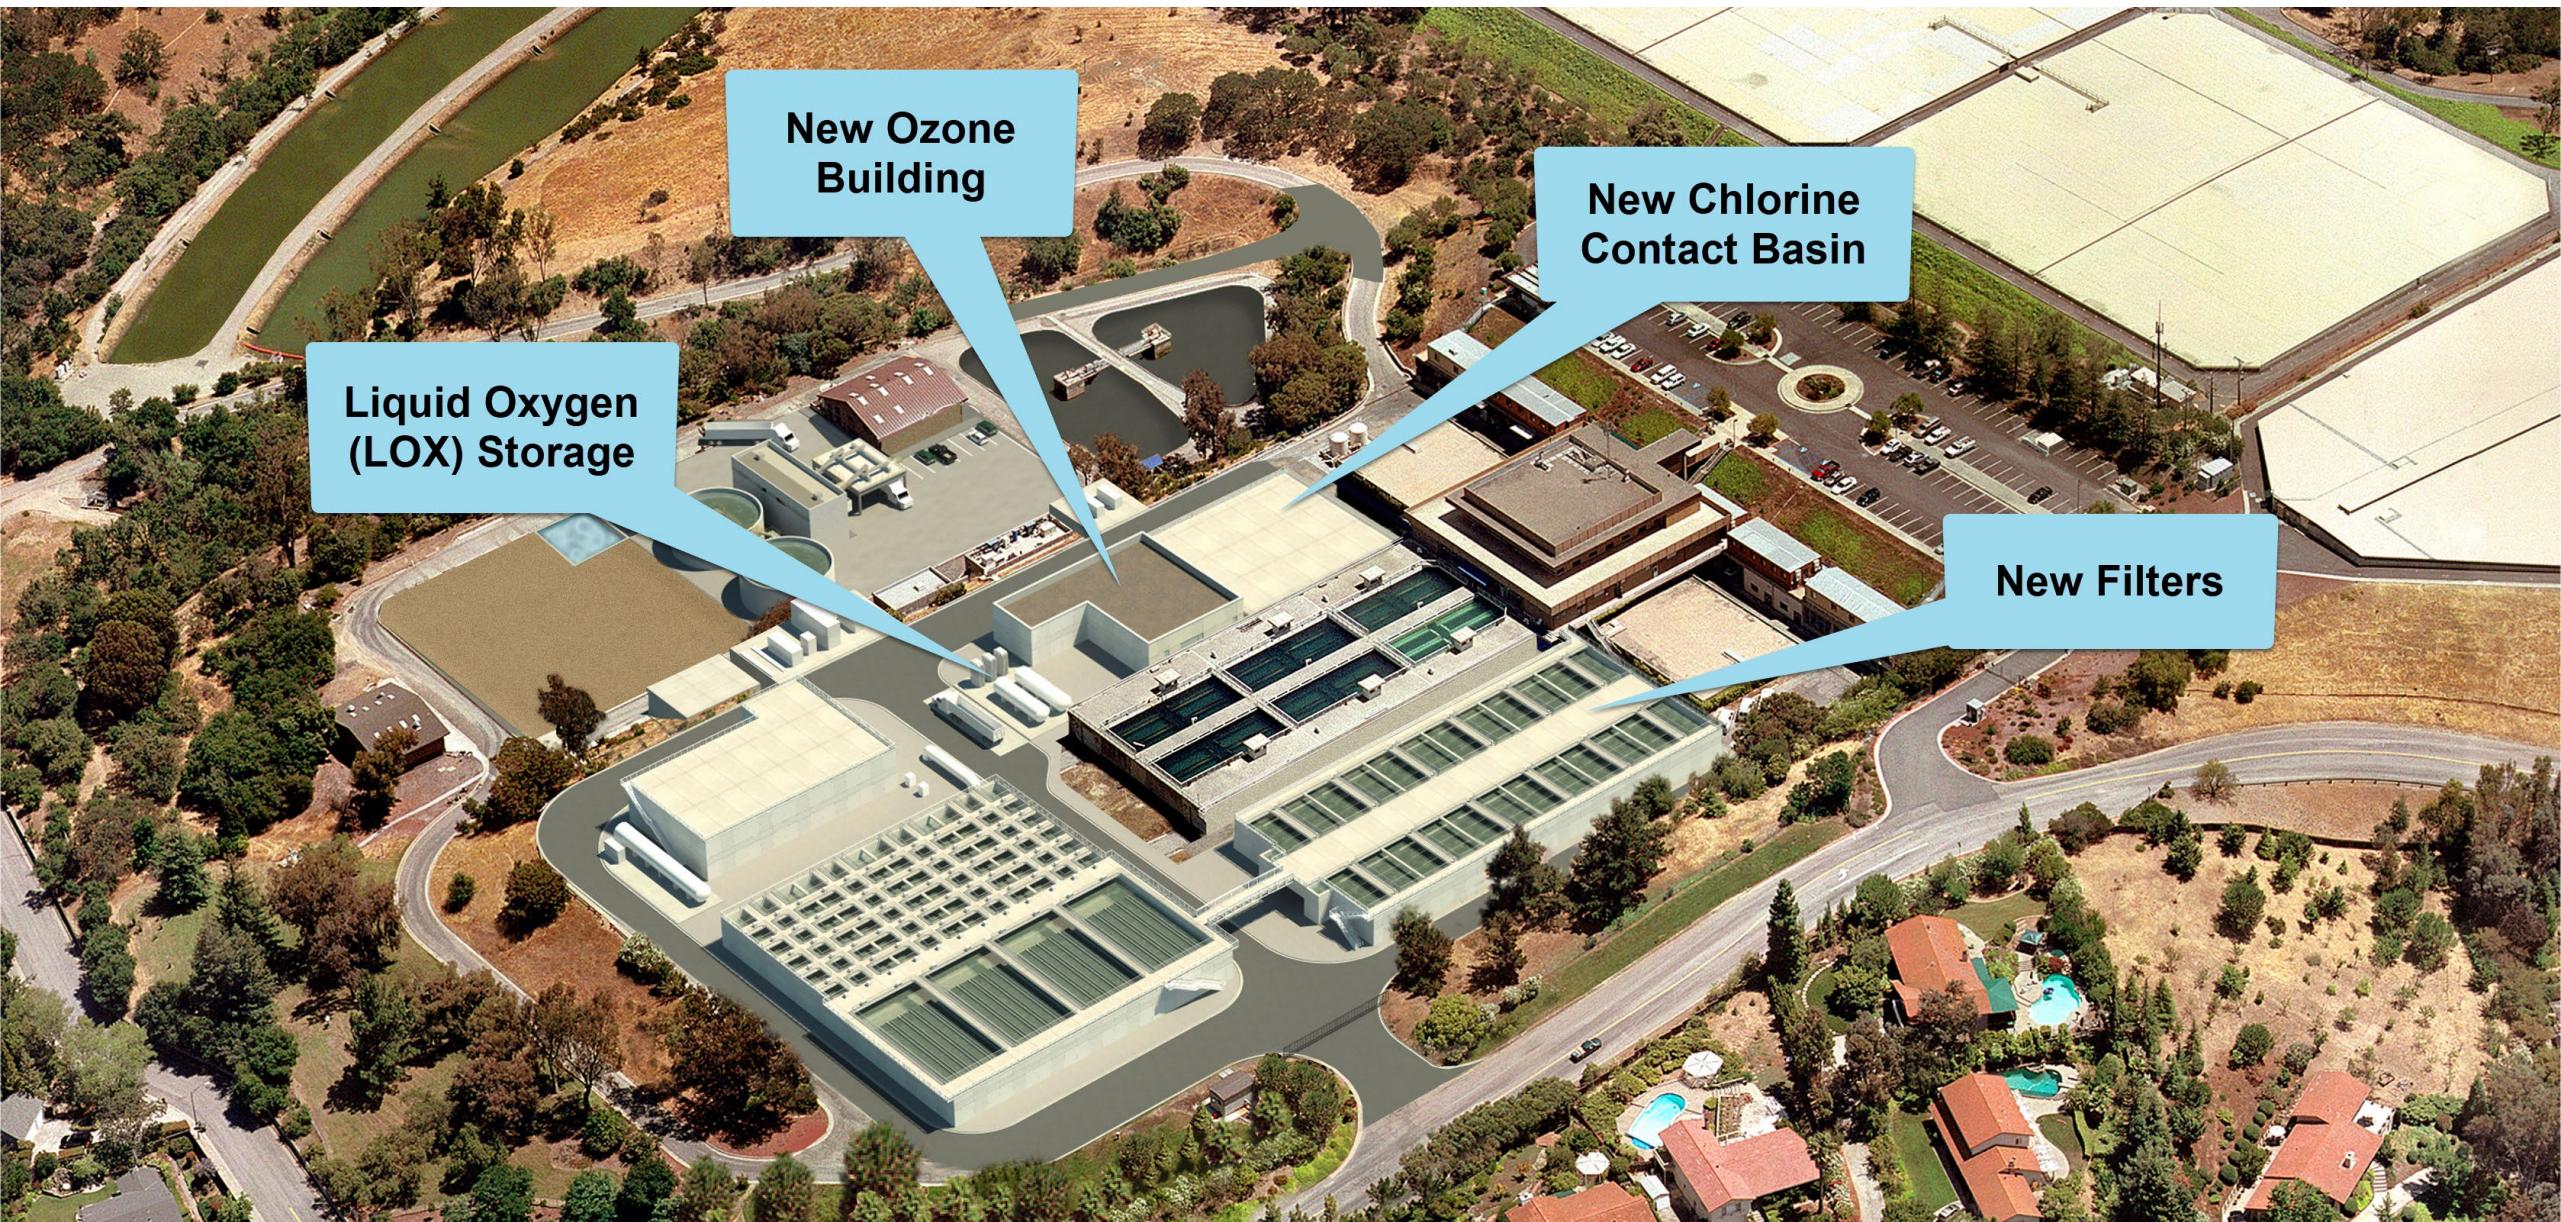

- Chemical Facilities
- Demolition of Existing Filters
- Demolition of Wash Water Recovery Basin
- Demobilization
- Project Closeout

# Demolition of Clarifiers (Phase 3)

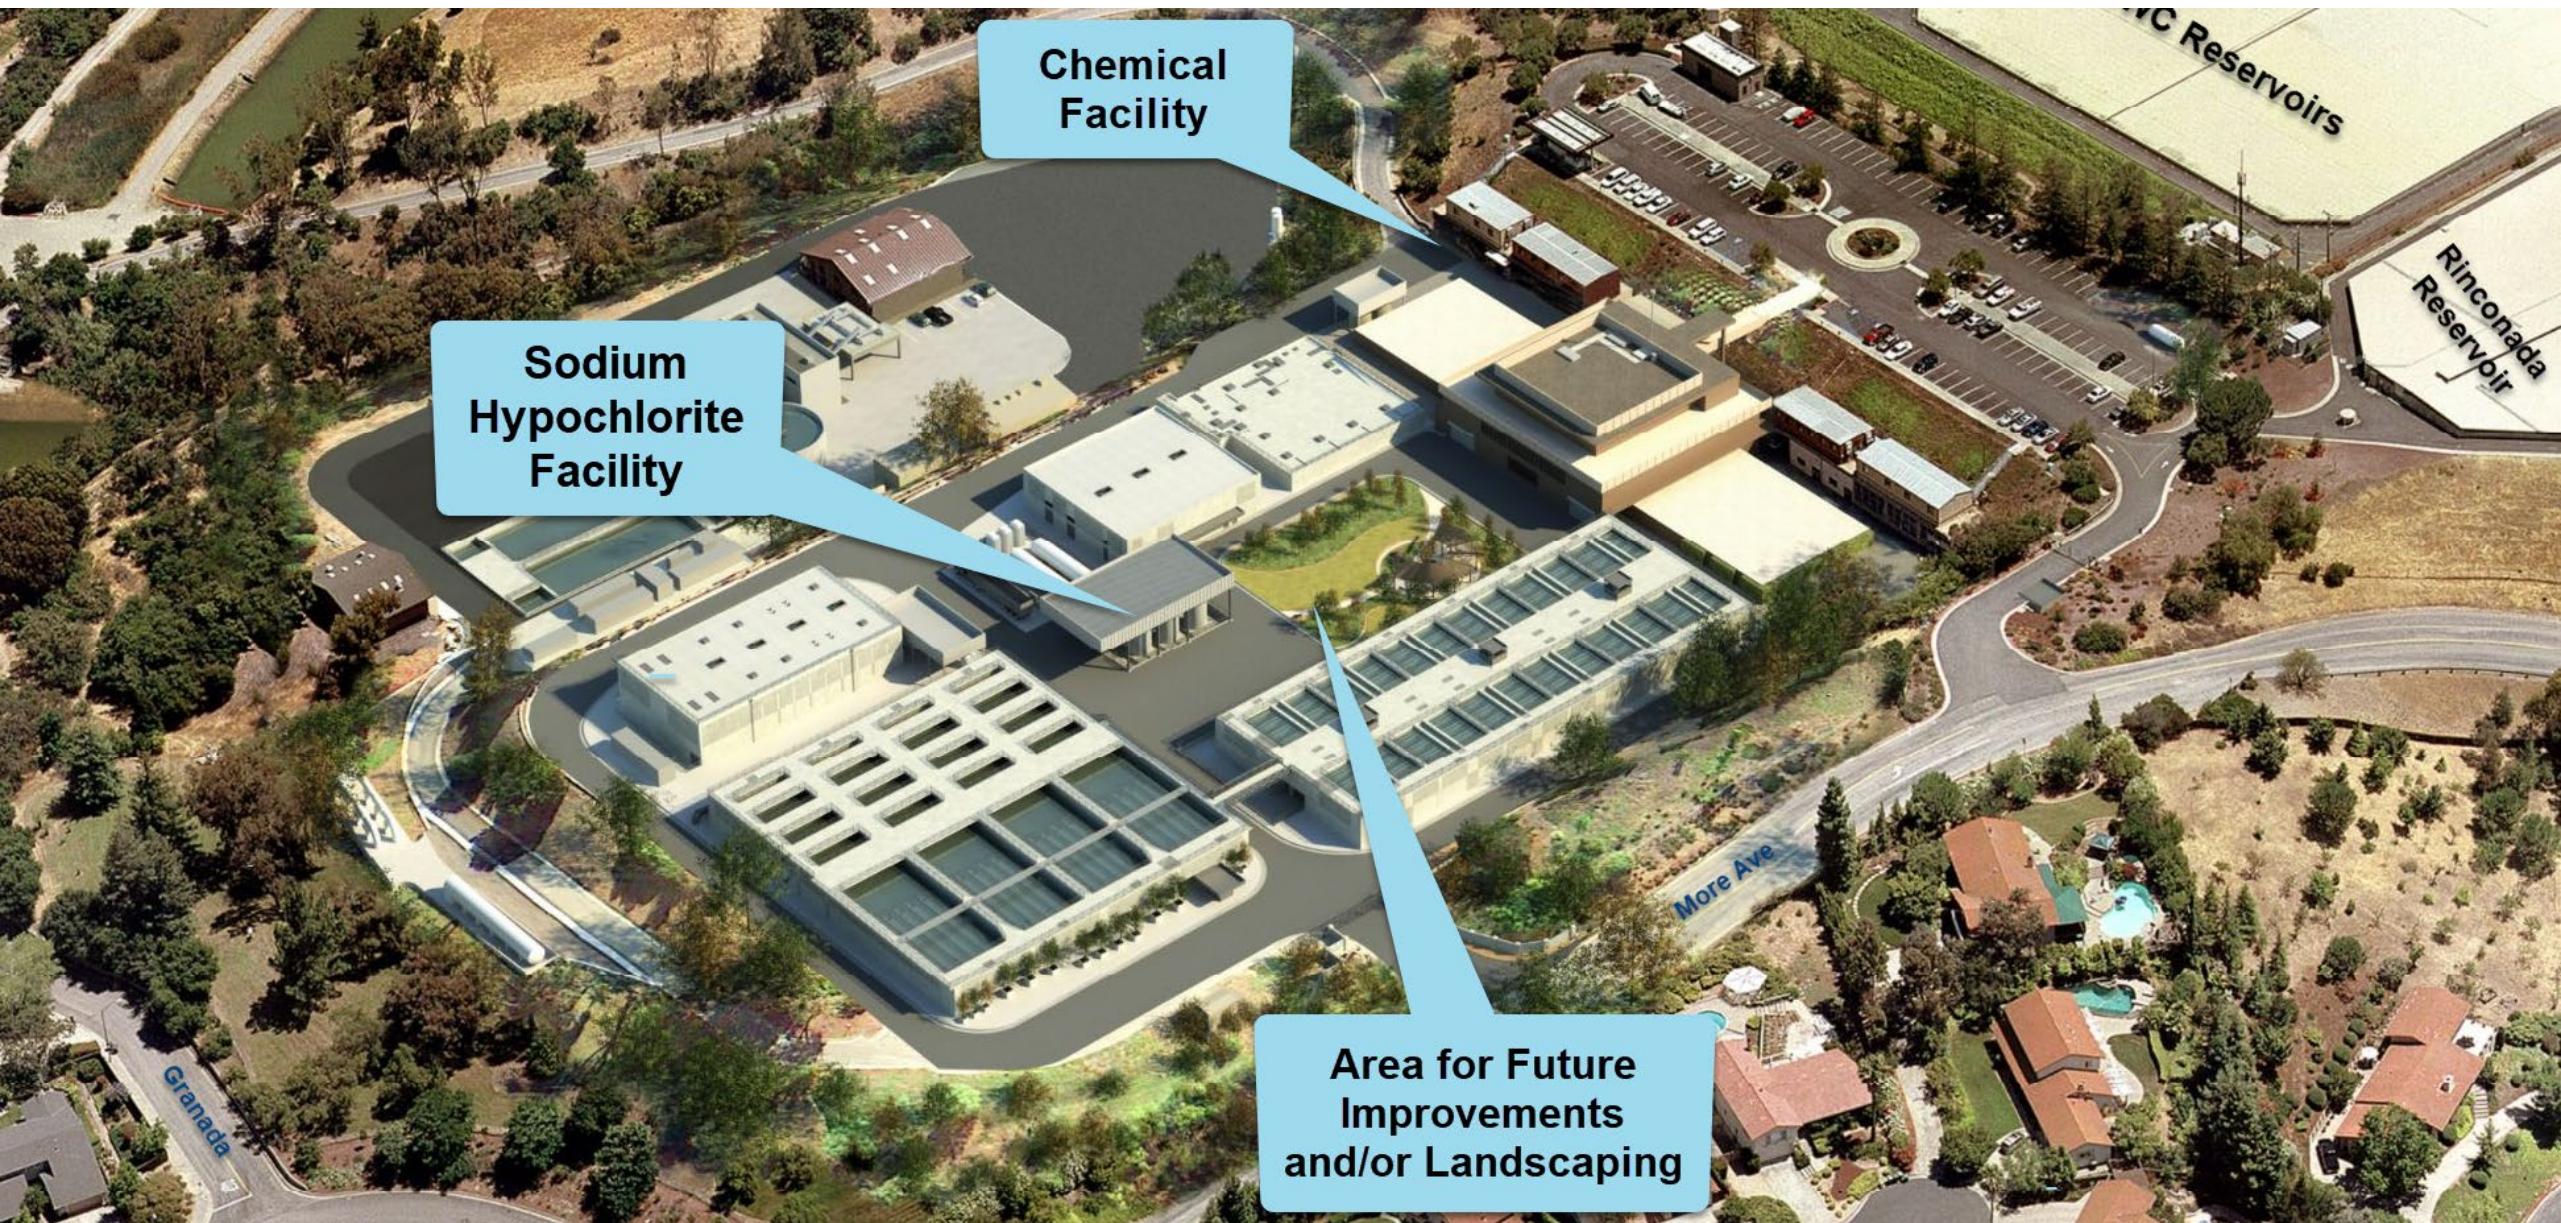

- Clarifiers, previously used to remove suspended solids are the largest feature at the plant
- Demolition is set to take place mid-March during Phase 3 of the project

# New Facilities (Phase 4)

# New Facilities (Phases 5-6)

# Project Timeline (Phases 3-6)

# Project Information

Rinconada Water Treatment Plant

## Reliability Improvement Project Phases 3-6

The Reliability Improvement Project replaces and upgrades all major plant components and allows Valley Water to meet the increasingly stringent standards for water quality, seismic stability and safety. The work will also increase the plant's treatment capacity from 80 million gallons of water a day to 100 million gallons a day.

This project will allow Valley Water to continue to provide safe, clean, drinking water to the west side of Valley Water's service area.

Project cost: \$334 million

### Board of Directors

John L. Varela, District 1  
Barbara Keegan, District 2  
Richard P. Santos, District 3  
Jim Beall, District 4  
Nai Hsueh, District 5  
Tony Estremera, District 6  
Rebecca Eisenberg, District 7

# CAPITAL IMPROVEMENT PROGRAM

The Capital Improvement Program (CIP) contains Valley Water's capital projects, which includes flood protection, water quality and infrastructure maintenance efforts. Valley Water's annual review of projects for potential placement or removal from our 5-year CIP is underway.

You're encouraged to participate in our process and share your feedback regarding which projects should be prioritized by Valley Water.

More information on the Water Supply Master Plan can be found at <https://delivr.com/2st85>.

For any questions please contact Jing Wu at [jwu@valleywater.org](mailto:jwu@valleywater.org).

# WATER SUPPLY MASTER PLAN 2050

A decorative graphic at the bottom of the slide features a stylized, wavy line of blue water with numerous small white bubbles, extending across the width of the slide.

The Water Supply Master Plan is Valley Water's guiding document for long-term water supply investments to ensure water supply reliability for Santa Clara County. Updated about every five years, this long-range plan assesses future countywide demands and evaluates and recommends water supply and infrastructure projects to meet those demands to achieve Valley Water's level of service goal through the planning horizon. The Water Supply Master Plan 2050 extends the planning horizon to 2050. Once developed, the plan will detail Valley Water's investment strategies to provide a safe, clean, and reliable water supply for Santa Clara County.
